Transformers Product Line (Dry)

Line Frequency Transformers

Transformers designed specifically for harsh electrical and environmental demands imposed by continuous duty corona discharge ozone generation and electrostatic applications. These transformers are NOT oil filled. Cost-effective, compact, and high generation efficiency design capable of supporting typically twice the ozone generation load of a conventional transformer. Vacuum impregnation sealed for long service life.

[PRODUCT DETAIL](#)

Resonant Systems Components Medium/High Frequency

Designed to provide maximum efficiency by allowing digital pulse drive by SSD and ATI series inverters. Magnetic package converts pulse waveform to sine wave on cells for energy efficient operation. Designed specifically for harsh electrical and environmental demands.
