

View / Update DAT210 Setup Files

Directions for use :

Place this word document (includes processing Macros) in the directory containing your setup files. Open it ,then press CTRL + space, A, 1 or U as described below.

CTRL + space - To display these usage directions

CTRL + A - To UPDATE all files in the directory

Original files are unchanged, updated files are saved

with a CHG prefix on the original file name.

M138 updated to 80, M139 updated to 00.

CTRL + 1 - To DISPLAY an individual file in the directory in a more readable manner

CTRL + U - To UPDATE an individual file in the directory. Same updates as CTRL + A.
except the original file is updated. No copy with a CHG prefix is created.

When done, the contents of the last query will remain for printing if desired.
